

HAND SIGN WITH LED

ENERGY SAVING

Thanks to the long life of batteries i.e. several years due to the LEDs consuming lower energy compared to the incandescent lamps, there is no need for charger.

LONG LIFE

Obviously, the products combined with quality LEDs conforming to the standards are used for approximately 10 years.

The reflective folio material used in the product is used for 7 years in outdoor atmosphere.

STRONG

The polycarbonate lenses are very strong thus only the strokes made by hammer can give damage.

ABS body is resistant against fallings from tall places.

COST SAVING

No maintenance cost is required except the battery costs that may be necessary once two or three years.

EASY HANDLING

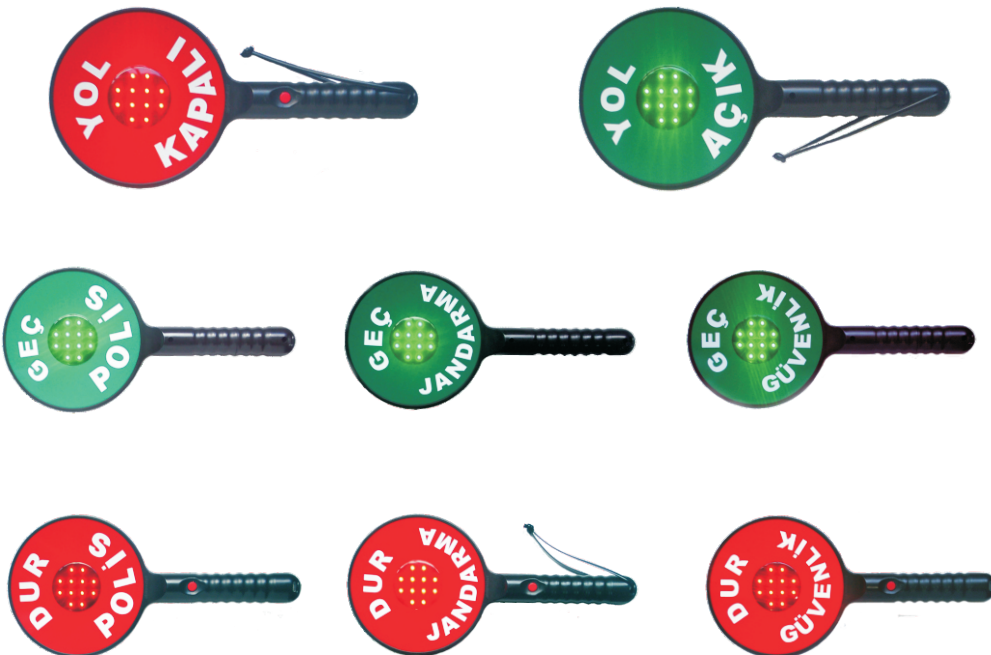

The weight is only 450 gr including the batteries;

The handle is completely comfortable and ergonomic;

Easily usable;

Carrying the equipment is easy due to hanging apparatus;

The touch buttons are used easily for illumination, on the other hand it is prevented to leave the equipment on.

APLLICATION

HAND SIGN WITH LED

The weight is only 450 gr including the batteries

The polycarbonate lenses are very strong thus only the strokes made by hammer can give damage.

The touch buttons are used easily for illumination, on the other hand it is prevented to leave the equipment on

The handle is completely comfortable and ergonomic

There are 12 SMD type LED on both surface

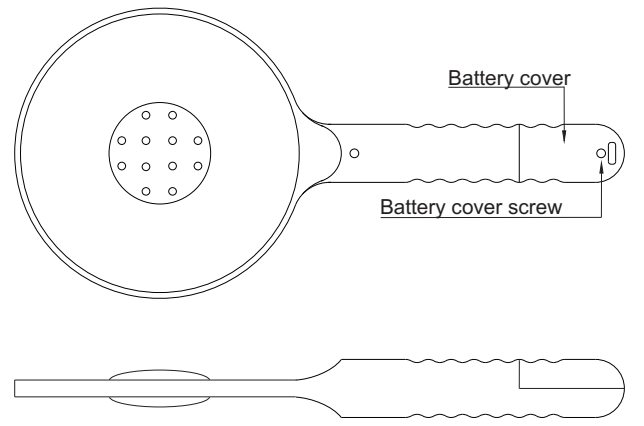

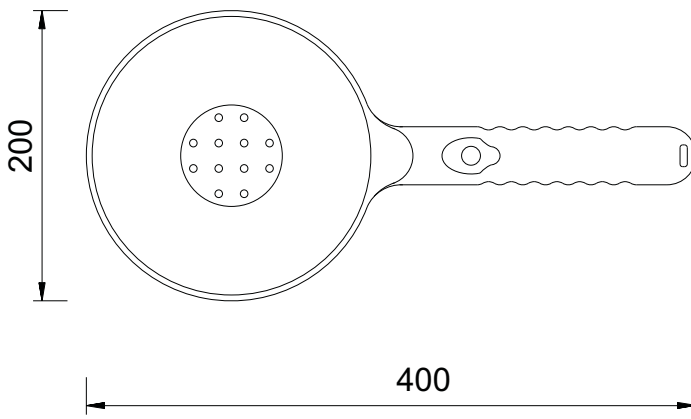

Reflective folio

Carrying the equipment is easy due to hanging apparatus
